DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:

On page 1, the phrase "This is a continuation of US Non-Provisional Application No. 09/972,236 filed October 05, 2001, now is US Patent No. 6,685,622 B2 issued February 03, 2004." Should be inserted on line 2 before the phrase "This application claims". Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 55-58 and 63-74 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4, 6, 8, 9, 14-16, 17, 18, 22, 24, 25, 28, 33, 35, 36, 38, 40-45 and 47 of U.S. Patent No. 6,685,622. Although the conflicting claims are not

identical, they are not patentably distinct from each other because claims in the Patent present a device for maintaining an area in an isolated environment, and claims in the present Application present a method of using the device of the Patent. It would have been obvious to one of the ordinary skill in the art at the time of invention to use the device of the Patent with the steps disclosed in claims of the present Application.

Allowable Subject Matter

3. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art, either alone or in combination, teaches or suggests a method comprising a step of introducing sterile gas into an isolated environment by using means for refilling; wherein said sterile gas is chosen from nitrogen, argon and a mixture thereof.

4. Claims 59-62 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Scott et al. ('222) ; Argenta et al. ('643) ; Cox et al. ('389) ; Piet et al. ('903) ; Arner et al. ('293) ; Akers et al. ('916) ; Trexler ('286) ; Folsom et al. ('753) ; Landy ('571) Dore, Jr. et al. ('143) and Püschner et al. ('077.
